MAXX DELUXE

Dual Pump Flood Control System

TWO PUMPS, ONE CONTROLLER, PLUS A BACK-UP EQUALS COMPLETE REDUNDANCY!

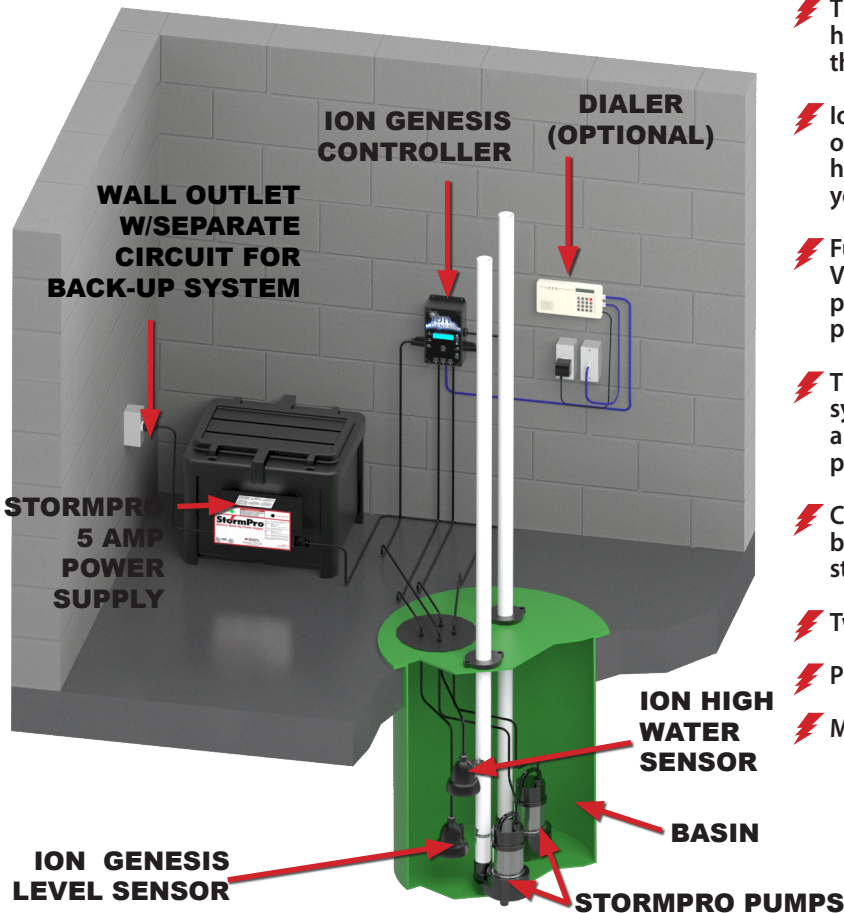

- ⚡ Back-up unit runs on either AC or DC Power**
- ⚡ Works as both a primary and battery back-up system**
- ⚡ Genesis Controller monitors all pump activity, including pump running current, pump trending and much more.**
- ⚡ Easy to use display allows for self testing and fully adjustable pumping differential keeping the end user in complete control at the touch of a button**
- ⚡ Built-in alarm and LCD display alerts of potential failures before they occur, optional dialer will call up to nine phone numbers**
- ⚡ Ion digital level sensors have no moving parts or pieces to fail and will far outlast common switch types**

Because Flooding Is Not An Option!™

TYPICAL INSTALLATION

FEATURES & BENEFITS

- ⚡ The StormPro Maxx Deluxe Back-up system utilizes two reliable heavy duty 1/3 HP, 115 VAC sump pumps, unlike most systems that rely on one small plastic bilge-type DC pump.
- ⚡ Ion Genesis will cycle each pump as needed; if one pump fails the other pump will take over and sound an alarm. The Ion Genesis has a built-in high water alarm and is capable of connecting to your home security system or optional phone dialer.
- ⚡ Fully automatic, converts 12 V battery power into standard 120 V electricity to run the 1/3 HP StormPro sump pumps when the power is out. Runs off of standard 115 V electricity when the power is on, avoiding unnecessary battery drain down.
- ⚡ The 1/3 HP 115 V StormPro sump pumps supplied with the system are extremely efficient, only drawing 4.5 amps, providing a longer run time while pumping more water than most 1/2 HP pumps.
- ⚡ Capable of using one or two deep cycle maintenance free AGM batteries that perform better and last twice as long as the standard type.
- ⚡ Two indicator lights tell you the status of the system at all times.
- ⚡ Protective non-corrosive electronics enclosure and battery case.
- ⚡ Made in the USA.

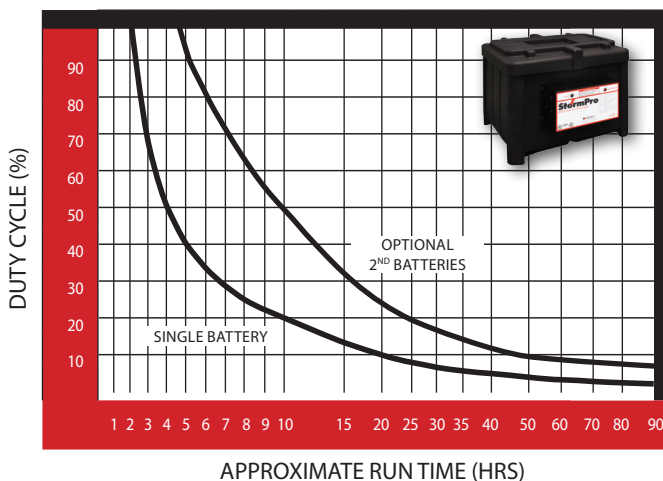

Power+ Battery

For optimal performance, install Metropolitan Industries' maintenance-free AGM **Power+** Batteries (not included).

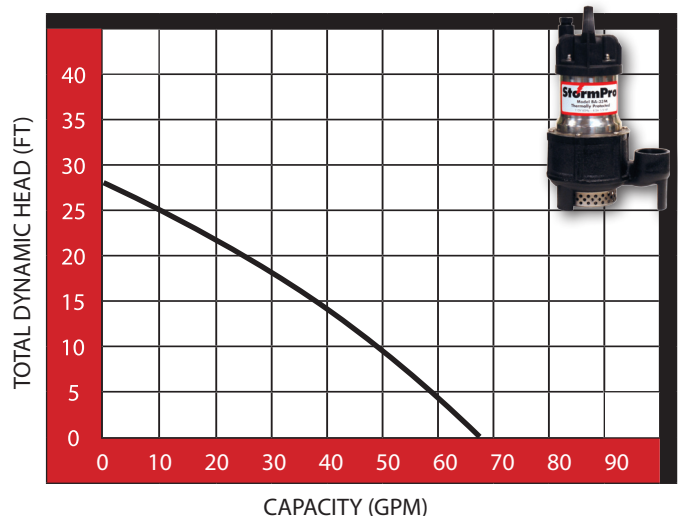

STORMPRO SYSTEM PERFORMANCE

(BASED ON A FULLY CHARGED BATTERY)
