

Power+

Maintenance Free AGM Battery

Engineered for Ion Technologies battery backup systems, including our selection of standard 120 volt AC powered sump pumps for steady high-capacity power outage backup.

Requires zero monthly maintenance. Comes fully charged and ready to install for easy battery backup system configuring.

True deep cycle battery withstands excessive depletion and charging from regular backup pump use, ensuring years of reliable service.

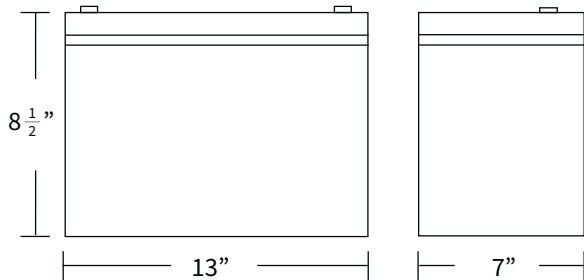

Completely sealed and spill-proof with no risk of exposure to hazardous chemicals. Safe for shipping anywhere in the U.S.

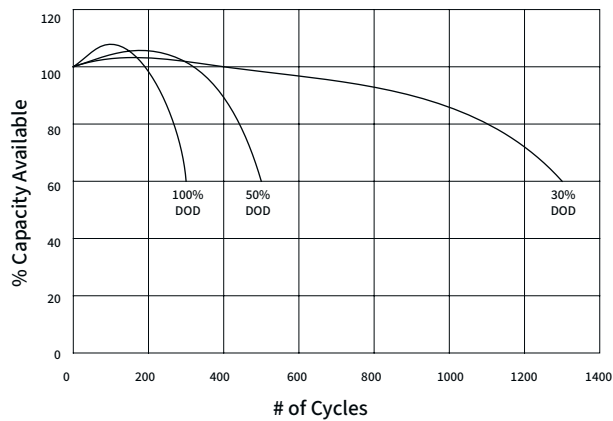

Designed to run for extended periods of time. Each Ion Technologies backup system can be configured with multiple batteries to accommodate high demand situations.

Features

- Maintenance free
- Lasts twice as long as typical batteries
- Completely sealed and spill-proof with no exposure to hazardous chemicals
- Safe for standard shipping in the USA
- Works with virtually all types of backup systems
- Performs up to 35% better than standard deep cycle batteries
- 3 year warranty

Power+ Specifications

Part Number	P20397
Nominal Voltage	12 Volt
10 Hr Rate Ah	120 Ah
Model	31P-36
Size L x W x H	13" X 7" X 8 1/2"
Weight	70 lbs
Terminal	Type B threaded copper
Bolt Size	M6 bolt
